

APOLLO REACH HOSPITALS, KARIMNAGAR BRAND NEW

FROM : MY STORY -NAGI REDDY (Patient)

GOOD MORNING TO ALL.

I am 77-year-old man had a family comfortable lifestyle by and large fairly satisfied with my life. Pain started in my both knee about 10 years very minimal insidious in onset relieved with medication and rest. The pain worsened finally in July last year, I had my right knee replaced and it went like a peach and had given me such a relief.

I have opted for the left total knee replacement. This too has gone off. I am ever so pleased with right TKR, now the left TKR too is going well. I was operated on 28/05/2022 by Dr. Venkat ready, the same surgeon who was worked wonders with my right TKR. The whole process went like a clock work and initial pain expected.

After all the disease part of the joint was saved off and the new implant inserted. First physiotherapy sessions was nothing short of Torture. I must confess, I truly hated that young man with great goodness and very very thankful to Dr. Venkat Ready, Nursing Staff, Physiotherapist and all the supportive staff.

Thanking you.
